Indiana University podcast innovators announced

Over 60 podcast projects to launch across all campuses this fall

FOR IMMEDIATE RELEASE

June 19, 2008

INDIANAPOLIS – The Indiana University Faculty Podcasting Initiative will support over 60 innovative faculty members as they explore the possibilities of podcasting in higher education and student learning. Supported by Agile and TAP, with equipment and software—Podcasters will coordinate with the guidance of the 15 centers for teaching and learning faculty projects will commence in the fall semester of 2008.

While podcasting is now new to IU, this initiative broadly expands the activity across the university and integrates multiple partners faculty podcasters, offering a variety of ways users can choose to access to content, and enabling instructors to expand their use of podcasting.

The Faculty Podcasting Initiative, administered by the University Information Technology Services (UITS), will distribute funding for podcasts, recording equipment and computer software to encourage faculty to create and apply forward-looking instructional and student-learning approaches using new media. Participating faculty members and entire departments (from a broad range of disciplines and units) in the statewide networked faculty and software grants totaling more than $1 million.
