

# Getting Started with Sakai

Even though Sakai is a server-side software product, getting involved is not only a programmer's thing. Input from all stakeholders is not appreciated, it is vital to the overall improvement cycle. So whatever talent, experience, or information you may possess, there is room for you in the Sakai community!

aggregate and organize various "newbie" guides in a simple structure here...

- Getting Started in general
  - Getting Started in Building
  - Getting Started in Deploying
  - Getting Started in User
- in each section reference intended audience roles (e.g., javascript developer, end-user support)
- limit it to 5-7 main points at the top-level
