QA Server Environment: (Copy from footer)	Sakai 2.9.0-rc01 (Kernel 1.3.0-rc01)
Evaluation Participants:	Walt Stover/Scott Williams
Evaluation Complete: (Yes / No):	Yes

Accessibility Issues and Recommended Solutions

Task / Subject	Results / Issue	Recommendations	Priority	JIRAs
Log in as a New User	Pass			
Go to the Profile tool	Pass			
Post a Status Update	Pass. No confirmation announced after posting. Focus remains on "Say it" button. Must arrow back up to find message.			
Create/Edit Your Profile	Pass: Able to add nickname. Fail: Unable to arrow into Birthday field. Tabbing to the field activates the date-picker, which is inaccessible; Walt was only able to view some for the day/dates, and was not able to select a date with it. "Birthday read-only edit" announced when Walt arrowed to control. Form labels not apparent. Pass: Able to save.			
Add an image to your profile	Pass.			
Search for people with common interests and view their profiles	Pass. Error message visible to sighted users was not announced when Walt checked the wrong box.			
Make a Connection Request	Pass.			
Accept a Connection Request	Pass.			
Set Privacy controls	Pass. Confirmation not announced, but Walt was able to arrow down to confirmation message.			
Set Preferences	Pass.			

Priority Definitions

- Critical: Issue will keep some/all users from being able to use this tool.
- Major: Issue will cause significant difficulty to some/all users and should be revised.
- Minor: Tool can be used successfully, but functionality will be significantly improved by fixing issue.
- Trivial: Indicates that this issue has a relatively minor impact.
