

# Sakai 10.2

## Summary of Highlights

- Sakai 10.2 includes about 70 fixes.
- Several security fixes.

## Known Issues

**Sakai 10 Oracle upgrade scripts.** [Please use database upgrade scripts from trunk for Sakai 10.0 and later.](#)

 **SAK-27501** - Roster 2 require roster.viewallmembers or roster.viewgroup to work CLOSED

## List of Issues Fixed

T	Key	Summary
	SAK-39899	Add support for stripping html tags as well as escape sequences to kernel utils
	SAK-39553	Create new site.duplicate event names
	SAK-38506	System won't start with OSP + Content in File System + 10.1
	SAK-38292	Settings dialog title is "Edit Title" instead of "Settings"
	SAK-38291	Preserve customized data when editing link to a resource
	SAK-38195	Stack Overflow in Lessons LessonsAccess.java
	SAK-38128	copying text with url produced from uploading file with space in it fails
	SAK-38111	can't download resources with right click
	SAK-38101	content link / tabbed depending on description length
	SAK-38026	Update en_GB for lessons tool
	SAK-38010	Rounding error blocks students from progressing to next quiz
	SAK-37975	Changing the prereqs on a quiz that is released conditionally causes the grades for students who have already taken it to disappear from the T&Q GUI ;; also, duplicate access control groups were being created
	SAK-37915	Rubric title prevents saving if apostrophe
	SAK-37778	Change Lesson's option "page will appear but user will get an error" label and info message
