

# UC Berkeley's design & development work

2012 Conference presentation ([Keynote](#)) ([PowerPoint](#)) ([PDF](#)) outlining our project as it stands & our plans...

## Resources

- Berkeley [Eval Sys Project confluence space](#)
- [Design space](#) on confluence - to see mockups of implemented & planned work
- Fall 2012 [requirements prioritization](#) (see excel spreadsheet attachment)

## Implemented

Goal to move all of this into trunk by Fall 2012

- Created new "matrix" rating scale display type (see [evaluation designs](#))
- Added configuration options to include "Save & complete later button" and/or "Cancel" button to evaluations
- Developed custom CSS so each institution can have their own eval sys CSS
- Minor UI changes to the [evaluation](#), mostly in our CSS
- [Dashboard](#) UI updates
- Added configuration option to include evaluations on dashboard for X days after closing. Grouped dashboard configuration settings together
- Added ability to [bulk import & export configuration settings](#)

## Future work

Planned for Fall release at Berkeley. Our goal is add back to trunk early & often. We'll hold regular community design reviews of this work.

- Add [Scale display preview](#) during scale creation & while selecting scale display during template creation
- [Dashboard improvements](#), including adding respondents link back in
- Information architecture improvements to the administration page
