

Sakai Development Infrastructure

Sakai uses the following tools for conducting its development work:

- [Infrastructure Requests](#)
- [Sakai 2.9.x and 10.x Source Control – Subversion](#)
- [SVN Password Reset](#)
- [Issue/Bug/Feature Tracking – Jira](#)
- [Sakai Wiki – Confluence](#)
- [Email Lists – Mailman](#)

We always need help administering these systems and it is a great way to contribute even if you don't have much time. Contact the current administrators if you'd like to help out.

Infrastructure Requests

Requests for any Sakai infrastructure changes (e.g. new svn commit privilege, new JIRA project, new Confluence project) are now tracked via the JIRA Infrastructure project at <https://jira.sakaiproject.org/browse/INFRSTR> -- please make all requests for changes /additions/deletions by creating a new JIRA Infrastructure issue or sending an email to infrastructure@collab.sakaiproject.org.

Sakai 2.9.x and 10.x Source Control – Subversion

- Where to find it:
 - Main SVN: <https://source.sakaiproject.org/svn/>
 - This is where the core Sakai source code is stored, code here is managed, tested, and released by the foundation
 - Contrib SVN: <https://source.sakaiproject.org/contrib/>
 - This is the community source space, anyone can have a space created here by request for Sakai related projects
- How to get access:
 - Creating a space in contrib
 - Requesting access for others to your contrib space
 - Requesting access for others to areas in the main SVN
- How to contact the administrators: -Send an email to infrastructure@collab.sakaiproject.org or Create a JIRA Infrastructure issue
- Admin Documentation: [SVN Admin FAQ - DEPRECATED](#)

SVN Password Reset
