## Contrib: Wimba Integration

**Lead(s):** James Linder, Thomas Rollinger, Jeff O'Connell

### Description

Integration of Wimba and Sakai.

### Source

The wimba-integration source code can be found at: <https://source.sakaiproject.org/contrib/wimba>

Please read the [README.txt](#) file for information on building the source.

### Updates

The code in contrib won't build for 2.5, and won't support Safari on Leopard. I have fixes. I'm trying to figure out how to get them back into contrib. [hedrick@rutgers.edu](mailto:hedrick@rutgers.edu)
