

# Sakai Properties Reference

## Sakai Properties Reference

### Introduction

These pages present a list of the known options which can be configured in the sakai.properties file. This information was generated from the data used by the [Config Viewer](#) tool. This includes data derived from the sakai\_properties.doc file written by John Leasia, hours of research and code review by the author, and contributions from thoughtful individuals throughout the community.

For more information on the Sakai properties file, see the "Additional References" section at the bottom of this document.
