## New Developments

A new version of the Blog is currently under development. In addition to addressing various feature requests, a list of which you will find below, the new Blog features a brand new editing interface which makes the editing process far more intuitive, as well as a re-engineered (and de-xmlised) database layer. All binary resources are now located in Content Hosting which makes archiving a simpler business (no more binary content in exported XML).

**See the attachments area for some screenshots.**
