

Sakai on Rails - Integrating Ruby and Sakai

Sakai on Rails: Integrating Ruby and Sakai

Speaker(s): David Adams

Session Abstract

Learn how to harness the agility and power of Ruby on Rails within Sakai for automation of administrative tasks and rapid tool development.

Presentation Materials

[Sakai on Rails Powerpoint](#)

[Rails plugin for Sakai proof-of-concept code](#)

Note from the Presenter

(2010-03-11) No further development has been done since the presentation. The code referenced in the presentation is no longer publicly available via the URL given, so I'm attaching that code here in the file referenced above. I guarantee the code won't work in current versions of Rails, but the basic features of which files need to be added and updated in the WAR package should still be roughly accurate.
