

Sakai 2.9 Accessibility Review Reporting Templates (2012)

Please use this Confluence Wiki to report your accessibility review results as children of the [Sakai 2.9 Accessibility Review Results \(2012\)](#) page. We have created a template wiki page which you can copy and use. The two templates are:

- [Sakai 2.9 Firefox Comprehensive WCAG 2 Protocol Results Template \(2012\)](#)
- [Sakai 2.9 Walkthrough Script Results Template \(2012\)](#)

When you copy these pages, they will automatically be children of the [Sakai 2.9 Accessibility Review Results \(2012\)](#) page. Please rename the copied page to include the name of the tool that you are evaluating. For example: "Sakai 2.9 Profile2 Comprehensive WCAG 2 Protocol Results".

If you can't use the Confluence Wiki, please use these word documents to record your results. Be sure to let the Accessibility Lead know that the results are available so they can convert the word document over to a wiki page. Thanks!

- [Sakai 2.9 Comprehensive WCAG 2 Protocol Results Template.doc](#)
- [Sakai 2.9 Walkthrough Scripts Results Template.doc](#)

Each testing protocol has it's own reporting template. The [Sakai 2.9 Comprehensive Firefox WCAG 2 Accessibility Evaluation Protocol](#) protocol uses the [Sakai 2.9 Firefox Comprehensive WCAG 2 Protocol Results Template](#). The [Sakai 2.9 Functional Accessibility Evaluation Protocol \(Accessibility Walkthroughs\)](#) Protocol uses the [Sakai 2.9 Walkthrough Scripts Results Template](#) template.
