Sharing Google Docs Content in Resources

Type	Presentation
Presenters	Duffy Gillman, The rSmart Group, Inc., duffy@rsmart.com
Date	June 16, 2011
Time	10:15am - 10:45am
Room	Beaudry A

Description

[Sharing Google Docs Content in Resources](#)

As an initial investigation of use cases for integrating Google content and services into the Sakai collaboration and learning environment an integration of Google Docs into the Resources tool was completed. This work has been contributed to the Sakai community. This session describes the use of Google's data APIs and OAuth to achieve this integration. It demonstrates the integration and describes the options available to administrators and users. Finally it outlines potential areas for collaboration around improved integration of Google content in Sakai.

Session Materials and Links

This session was convened with [2011-06-16 Sakai CLE and Google Integration](#) and so shares slides with that presentation. Slides delivered for this presentation begin on slide # 22
