

4. Edit Preferences

1. Site Home Page

The screenshot shows the Sakai site home page for 'Joe's New Site'. At the top, there is a navigation bar with 'Back to My Dashboard', 'Joe Instructor (Sign Out)', 'Preferences', 'Site Settings', and 'Help'. A red circle with the number '1' highlights the 'Preferences' link. Below the navigation bar is a blue header with the site name 'Joe's New Site'. The main content area is divided into several sections: 'Tools' (Assignments, Gradebook, Resources, Calendar, Post 'Em, Blog), 'My Profile' (Joe Professor, Status: Online, 7 Friend Requests), 'My Friends (2)' (Sandra Tully, Mark Spencer), 'Updates & Announcements' (Mike Smith updated his profile, Laura Roberts published a new blog post), and 'Sites' (Campus Clubs, My Courses). On the right side, there is a 'Home' sidebar with 'Group Discussions' and 'Test & Quiz Center', and an 'Add Page' button. At the bottom, there are 'Add Widgets' and 'Edit Look & Feel' buttons. The footer contains the Sakai logo and copyright information: '© 2004-2008 The Sakai Foundation. Portions of Sakai are copyrighted by other parties as described in the Acknowledgments screen.'

1. Change password

The password will only be changed if these field have been changed. If not, it will only try to update the other fields

2. Save

This will save the changes you have made. The username cannot be changed.

Note: profile provider already gives all this data, if this is ok then estimates are minimal for the feeds, if more specific feeds are desired then this is fine also but increase estimates for feeds

ToDo :

Domain	Description	Work Estimate
Design	*Design confirmation message that shows after saving	3 hours
Technical	Implementation	16 hours

Data Feed	Make data feed which includes Time Zone and Language	4 hours
Data Feed	Make data feed that saves the first name, last name, email, password, time zone and language	4 hours
Data Feed	Make data feed that checks whether your current password equals the entered password	2 hours
		Total: 29 hours

*This will be used as a model for all (most) positive system feedback messages. I'll create one for error/negative system feedback message also.

3. Email Notifications

Email Notifications

Note: All high priority notifications are sent to your email address automatically. Low priority notifications can be disabled or modified using the following options.

Announcements

- Send me each notification separately
- Send me one email per day summarizing all low priority announcements
- Do not send me low priority announcements

Email Archives

- Send me each notification separately
- Send me one email per day summarizing all low priority notifications
- Do not send me low priority announcements

Resources

- Send me each notification separately
- Send me one email per day summarizing all low priority notifications
- Do not send me low priority announcements

Save
Undo Changes

As is
 Note: probably very easy if we use the profile feed work from above as this is just a subset of that

Domain	Description	Work Estimate
Technical	Implementation	16 hours
Data Feed	Make data feed that returns your current email notification settings	2 hours
Data Feed	Make data feed that saves the new email notification settings	2 hours
		Total: 20 hours

TOTAL HOURS = ~35 (.9 person weeks)
