## Description

<http://www.concentra-cms.com/program/Sakai/2011-sakai-conference/630.html>

Open Source Portfolio (OSP) community members will demonstrate institutional implementations of the portfolio tools in Sakai 2.7, including enhanced assessment capabilities, simplified portfolio templates, and the latest reporting techniques. Panel members will share actual user scenarios illustrating innovative ways to customize the portfolio tools in Sakai, as well as provide technical instructions and access to each innovation. Portfolio users at all levels of expertise will benefit from this session. Outcomes include expanded knowledge of possible ways to implement portfolios in Sakai, skills and resources for applying the innovations described, and enhanced networking among institutions using OSP. Institutions, organizations, and vendors planning to participate include Indiana University, University of Michigan, Virginia Tech, University of Delaware, Marist College, JaSakai (representing several Japanese universities), and Three Canoes LLC.
