

# Sakai Spring MVC Maven Archetype

## Information

### How do I get it?

Simply run the following command in your Terminal and follow the prompts:

```
mvn archetype:generate -DarchetypeGroupId=org.sakaiproject.maven-archetype -DarchetypeArtifactId=sakai-spring-
maven-archetype \
-DarchetypeVersion=1.2 -DarchetypeRepository=https://source.sakaiproject.org/maven2/
```

### How do I use it?

The output of the above command will produce a project that you can build and deploy to Sakai or add to Eclipse and extend.
