## Agenda

1. Volunteer to Take Minutes
2. [Virtual Working Session planning page](#)

With our Virtual Working Session scheduled for next week (2/4 and 2/5) I would like to use a good portion of this meeting to finalize some of the logistics and pre-event plans. This would include discussing how we might best form working teams, finalizing the agenda for both days (a draft agenda is posted on the Virtual Planning Session page now), and finalizing some of the technology solutions (several folks, including myself, have been researching options so we need to discuss these and make some decisions).

- We could use EtherPad during the session <http://etherpad.com/>
