

2. Create a Site

Be Careful

If you're following the storyboards, due to time constraints, only the "build" path was selected for implementation in 2.6. Creating a site by import, copy, and template will be introduced in future iterations.

1. Dashboard

The screenshot shows the Sakai dashboard interface. At the top, a blue header contains the text "My Dashboard" followed by "Joe Instructor (Sign Out) | Preferences | Help". Below the header, there are three main widget areas: "Tools", "Sites", and "My Profile".

- Tools:** A vertical list of tools including Assignments, Gradebook, Resources, Calendar, Post 'Em, and Blog.
- Sites:** A widget with a menu that includes "Join a Site", "Edit My Sites", and "Create a Site". Under "Join a Site", there are two categories: "Campus Clubs" (containing Chess Club and Mu Alpha Theta) and "My Courses" (containing MAT217, GBS221, ACC430, and ACC440). A red circle with the number "1" is placed over the "Join a Site" menu, and a red circle with the number "2" is placed over the "Create a Site" link.
- My Profile:** A widget showing the user's profile for "Joe Professor", with a status of "Online" and a bio: "Playing with my new site." It also indicates "7 Friend Requests".

At the bottom of the dashboard, there are two buttons: "Add Widgets" and "Edit Look & Feel".

1. My Sites widget

The link to create a new site can be found in the My Sites widget or in the Join a Site page

2. Create a Site

Will pop up the wizard to create a site

2. Create a Site: Non-Course

*A non-course site is the same as a project site.

My Dashboard Joe Instructor (Sign Out) | Preferences | Help

Tools

- Add Tools
- Assignments
- Gradebook
- Resources
- Calendar
- Post 'Em
- Blog

Add Widgets

Joe Professor
Status: Online
"Playing with my new site."

Create a New Site Help | Close Window & Cancel

Provide the following information and click the "Create Site" button

1 Is This a Course Site? No Yes [Help me decide](#) * = Required Information

* Site Name:
Joe's New Site 2

Site Description:
(Max 80 characters)

3 Go Back 4 Create Site Close Window & Cancel

1. Course site/Non-course site

Select whether you are making a course site or not.

ToDo :

Domain	Description	Work Estimate
--------	-------------	---------------

Technical	Make the extra options (dis)appear for a course site	8 hours
		Total: 8 hours

2. Site Name - Site Id - Site Description

This allows you to enter your site's name, unique id (used for the url) and description

ToDo :

Domain	Description	Work Estimate	Tracking
Design	Add the unique id field + design feedback on it	12 hours	
Technical	Implementation	16 hours	
Data Feed	Make data feed that accepts site name, site id and site descriptions and tries to save it	2 hours	✔ create /site/new (see /direct/site/describe)
Data Feed	Make data feed that checks the existence of a site id	1 hour	✔ action /site/:ID:/exists
		Total: 31 hours	

3. Go Back

Remove the Go Back button, because the intermediate screen has been removed too.

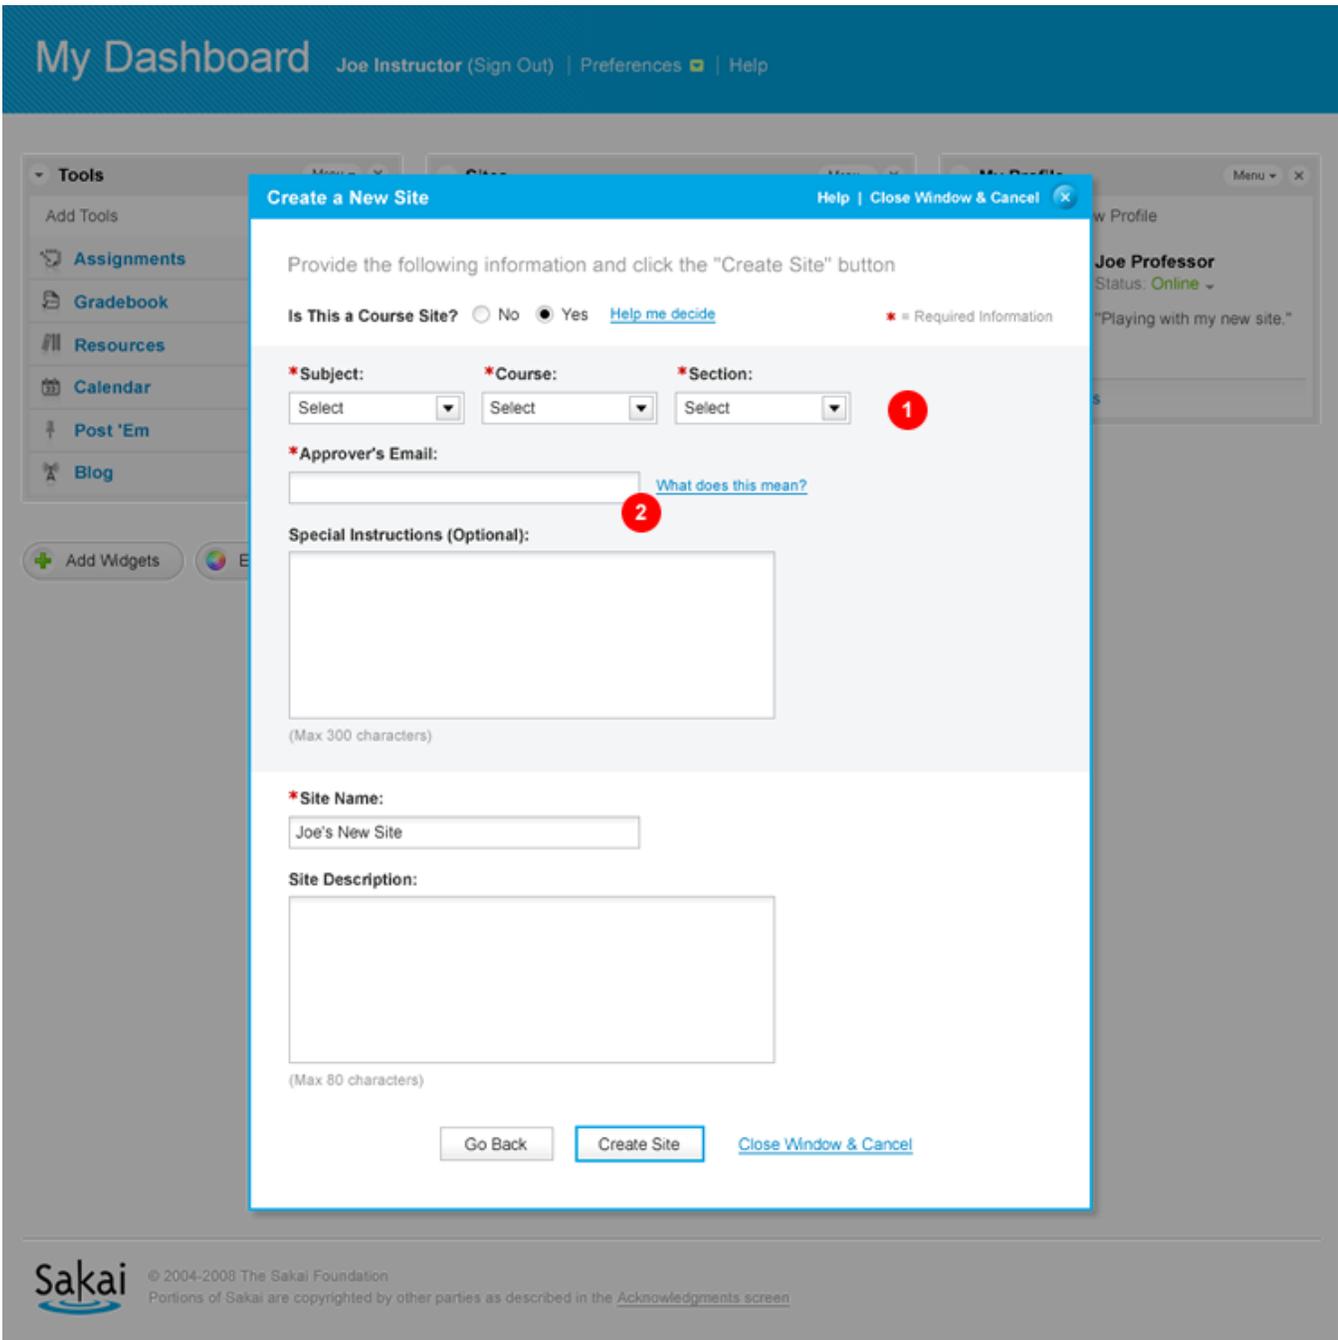

ToDo :

Domain	Description	Work Estimate
Design	Remove Go Back button	20 min
Technical	Make change in HTML	40 min
		Total: 1 hour

4. Create Site

Creates the site and drops you into the newly created site.

3. Create a Site: Course

1. Subject/Course/Section

The first feed is simply meant to get the field information (variable and configurable in Sakai) for course setup. This will not be called if not setting up a course site. Choices for the fields may be not set.

NOTE: This will probably actually have to be 4 separate feeds (term, subjects, courses, sections) rather than one

ToDo :

Domain	Description	Work Estimate	Tracking
Design	Investigate whether these fields are general enough and in what extent it needs to be customizable	8 hours	
Data feed	Data feed that return the available subjects/courses/sections	4 hours	✓ see /direct/course-data/describe for details
Data feed	Data feed that takes site id, site name, site description and subject/course/section	4 hours	
Technical	Implementation	16 hours	

		Total: 24 hours (Incomplete est.)
--	--	---

2. Approver's Email and Special Instructions

Remove for now. If an Instructional Designer sets up the course site, he can change the site's owner in the permissions screen once he is done.

TOTAL HOURS = ~72 (1.9 person weeks)
