Minutes

Sakai 2.6.1

- 2.6.x external refreshed. Pulled in updates.
- Several issues still being merged and a conversion script
- SAK-16548 - needs to be remerged and conversion script needs to be written
- Email sent on Properties changes - none
- Email sent on Conversion scripts - several
- Sakai 2.6.1 - 1st week of Oct 2009

Sakai 2.7.0

- no branch yet created, so no hardened 2.7.0 yet
- Looking for framework of freeze dates, suggested that we contact individuals and get feedback and buy-in from key players

Jira

- Discussion will continue offline
- Requested via email to branch managers to not include ".x" references
- Something needs to be done
- Have formal announcement about Pete owning Jira
- Track issues that need conversion script changes

Other

- Scan filter for 2.6.1 for additional issues by Friday (10/2) or Monday (10/ at the latest

Action Items - from 2009-10-01

- David will look at it tomorrow, unless someone else can do sooner
- Pete - email about 2.7.0 freeze dates
- Pete - Jira announcement
- Pete - Jira proposal

Action Items - from 2009-09-24

- email Sakai 2.6.1 update - Anthony
- email to 2.6.1 branch managers - Anthony
- email and calls to testers for 2.6.1 and trunk-qa
- review the filter for 2.6.0-2.6.1 fixes and update as needed
- the Release Meetings should include review of these filters (what is needed to test, what is ready to merge)
- periodic email to the QA community on jira related issues

Action Items - from 2009-09-17

- Samigo blocker
- Conversion scripts checked
- K1 change review
- Refresh QA branch
- Additional servers running 2.6.x
- Included issues for 2.5.6 and 2.6.1
- Security issue review
- Jira reviewers page
- Filters page - community filters page
