Thursday Afternoon

(Remote Participation in Sakai002)

- Ad hoc sessions
 - Get some work done on clickable prototypes

Minutes from 9-19-2008 Conference Call

- Need for more time aside for technical people? Might be some issues getting the requirements crowd to speak up.

- The agenda seems to be flexible enough to allow breakout sessions if necessary.
- 2.X vs 3.0 solutions and time tables need to be explained. We should build a pro/con table of each option, and decide if our main focus will be on short term, long term, or both (a fix for 2.X, a complete deployment for 3.0).
- Institutions should identify when these solutions would be locally implemented. Would set expectations better.

Logistics:

- We have drinks but no food.
- Nametags, tents, flipcharts.
- Need a local pub with wifi.
