## Attendees

- Seth Theriault
- Pete Peterson
- Chuck Hedrick
- Megan May
- Matt Jones
- Anthony Whyte
- David Horwitz
- David Haines

## Minutes

- **2.6.1**
  - Tentative release date: Sept 28, 2009
  - OSP QA testing?
  - QA heavy change areas
  - Send out email to QA
  - Several SAK issues that might need to be QA'ed and merged
  - Conversion scripts (Megan and Matt)
  - Mailsender jira (needs to be included) email Anthony and Pete
  - Reviewing K1 for possible new version
  - Some additional Internationalization issues ready for merging. Branch managers are working part-time on this.
  - Future: teams comfortable with separate releases will eventually
- **Jira Discussion**
  - Information in Jira not correct or updated
  - Common set of filters (RM and QA) - Pete lead on this
    - shared filters on confluence
    - should set fix version
  - Prototype project should be created (Anthony)
    - Team of community members working on this
    - priority
  - Set of instructions for fixing jiras (Anthony - draft)
- **2.7.0**
  - Rutgers needs before April 30, would prefer early March
  - the 2.7. release is being kept small, but UI improvements should be one of the focuses
  - community should nudge product console on what will be in 2.7
  - possible phased release approach (Dec 2009)

## Action Items

- Samigo blocker
- Conversion scripts checked
