

Authoring Summit - Technical issues

See also [Desired Outcomes](#), [UI and UX Issues](#) and [Project Planning](#)

Topics that should be considered at the Authoring Summit

- Status of Fluid's edit-in-place widget
- A widget for linking to Sakai entities (Josh Ryan's EntityPicker?)
- Creating new Sakai entities and linking to them
- A central source for information about types of entities and actions associated with them
- [Document Structure](#)
- [What Should an Entity Look Like?](#)
- [Toward Model-based Authoring Tools \(draft OSYL Team Notes\)](#)

Work that should be done to prepare for the Authoring Summit

- Need technology-agnostic way to specify helpers (for registry of helpers to create new entities, etc)
