Minutes

I. Sakai 2.7.0

- Feature freeze
- Need more feedback on the role of the Product Council. It is unclear if they control the content or if they advise and we decided. Who decides is the ultimate question?
- Regardless of this we should produce a list of inclusions for 2.7, vet it to the community and proceed. Should be tied to the next milestone.
- Tomcat: version? Seems to consensus on Tomcat 1.6 as 1.5 has a security issue outstanding (Looks like Java and Tomcat mixed)
- Databases: versions and scope of Databases. Oracle 9 an 10, DB2, MySQL, etc.
- Browsers: what are the baselines for testing various browsers? IE 7-8, FF, others?

- When will the actual release happen?
- Concern surrounding the lack of QA resources. Alan will be shaking the bushes and trees
-

II. General

- Selenium Scripts - gather from rSmart, Marist and work towards suite of scripts accrued from the existing scripts - Pete and Alan (Jean-François could help)
- 2.5.5 and 2.6.2 - Seth gathered the issues in these releases. Request for review.
