ScreenstepsLive Collaborative Authoring Tool

ScreenstepsLive is a cloud-based collaborative authoring tool that is being used to author the end-user help content for Sakai versions 10 and later.

You can visit the public Apereo Screensteps documentation website to view the currently published online help articles for Sakai. Articles will be published to this site prior to inclusion in the Sakai Online Help tool. You may review and comment on help articles found on the Screensteps site. https://sakai.screenstepslive.com/s

More information about ScreenstepsLive and the Sakai 10 documentation project was presented at the 2014 Open Apereo conference in a flipped session format.

Sakai 10 Documentation Project:

- Flipped session "Homework"
- Overview of Sakai 10 Documentation Work
- ScreenSteps Concept videos
- Open Apereo 2014 Presentation Recording
