

# 2009-02-07 Conference Call

Meeting minutes for February 7, 2009

## Sakai/OSP 2.6 and beyond Development Status

- QA – Sean has been doing great QA and writing up bugs. We need to decide which need to be dealt with right away.
  - [SAK-14998](#) downloaded portfolio archive url-encodes the FILENAME and not the URL in the html that refers to it (should be vice-versa) Fixed by Beth
  - [SAK-15348](#) Imported Matrices do not retain links to global forms. Still unassigned. Chris at IU may be able to look at it this week.
  - [SAK-15579](#) Supporting files for template based portfolios not making it through to the browser. Beth now able to reproduce it. Easily reproducible but not fixed. Will has a workaround: include presentation files in a 0x0 image.
  - [SAK-15564](#) Crash when sharing portfolio by email address. Beth will look at it this week.
  - [SAK-15276](#) Edit links appears for all reviewers/evaluators on feedback/evaluation, though they cannot edit. Noah marked this as critical and will try to look at it.
  - [SAK-15553](#) Saving the portfolio twice in a free form portfolio gives a stack trace Has been fixed.
  - [SAK-15541](#) Evaluators from different groups click on evaluations and get a 500 error
  - [SAK-15540](#) Matrix in "Preview" status is unavailable to users. Beth will look at it.
