

2008-04-07 Conference Call

Meeting minutes for April 7, 2008

Sakai/OSP 2.4 Status

- SAK-13210 - Save/Add Form generates Request Entity Too Large error. John Ellis posted a patch. Michican is working on reproducing the problem and testing the patch.
- SAK-13335 - Suggested Feature for usability - no one signed up to implement
- SAK-13337 - Sounds like a bug - if a coordinator is removed, materials are orphaned - no one signed up

Sakai/OSP 2.5 Status

- SAK-13114 and SAK-12119 - No updates from last week
- SAK-13336 - Aggregated Matrix Tool in My Workspace - Editing Matrix through My Workspace updates ownership and metadata of a Matrix - fixed and checked into trunk - Chris writing more details on ticket - trying to merge for 2.5.1 since it forces DBA involvement to fix
- SAK-13304 - IU customizations for selecting feedback users aggravating multiple placements of helpers - JSTL contents in helper cause conflicting contextual stuff - Chris planning to capture best practice in Confluence
- Site Info being placed in Portfolio sites - Fixed in trunk, waiting on merge to 2.5.x

LOI update on Multiple Evaluators

- LOI read through user stories and extracted [related functional requirements](#) not needed for driving the scenarios
- Distilled information into 3 basic scenarios ([functional requirements page](#)):
 1. Single Evaluation
 2. Multiple Independent Evaluations (no routing)
 3. Team Evaluation (one evaluation by a team, by way of routing)
- Noah planning to produce state diagrams to go along with swimlane diagrams

Mark requested that we look at documentation this week and **discuss on 4/14/08**

Generic term "Evaluatable Item" used throughout docs because Assignments team is working on evaluations as well - not just Matrix Cells

Lynn wanted clarification on use of term "blind evaluation":

- Mark: Two evaluators, independently creating evaluations where each cannot see the other's evaluation
- Lynn: Anonymity of submissions

Update of IU / Goal Management

- Discussion of enhancements planned for a future call - will be announced on list for call turnout
- IU work needs to be ready for production in Fall, so discussion will be more about adopting or not adopting, as opposed to community design

LaGuardia Conference

- Little developer representation
- OSP meeting seems to be scheduled for mostly show-and-tell / updates

Paris Conference

- Jan may be inheriting leadership of session planning - need clarification on participation for delivery of session
- All-day community meeting on July 4th (post-conference) - agenda not yet developed
- rSmart has suggested discussion of whole-suite cohesion and user experience (better integration into and throughout Sakai)
- Need discussion for deciding agenda - about six hours of time

Nightly server build

- Continuum build not yet set up
- Chris going on leave - will discuss with him after (in about a month)
