

2007-07-16 Conference Call

Status

Michigan – working on aggregated views

Indiana – no osp work in past week; GMT stated as a priority

rSmart – riNet is consuming developer resources for next 6 months, though development will be merged back into sakai eventually (though not clear it will be in time for 2.5). Focus is on Assignments and GMT. Details will be forthcoming.

LaGuardia – working on event logging

George Mason – UI Review process

Syracuse – UI review process

Portfolio4U – mostly working on 2.4 upgrade issues; plans on contributing to UI review process

Discussion

- GMT is a priority amongst many institutions
- Action item for next week: Use JIRA to vote on institutional priorities by next meeting
- rSmart has portfolio templates that will collect data from assignments – JIRA issue created to merge this back into Sakai, after discussion between John Ellis and John Leasia
- Wende to set up a separate call regarding gmt and assignments
