

2008-12-08 Conference Call

Meeting minutes for December 8, 2008

Sakai/OSP 2.6 and beyond Development Status

- QA – Marist has started working and made significant progress. No bugs have been found so far. Some of the scripts are dated, but the students at Marist are probably not in a position to update them.
- Sean has replicated the bug that Brian von Konsky found with sort order. He will write it up as a Jira.
- The problem with comments has come up again. Because of the way they are tacked on to the portfolio, most people can't use them. Beth changed the status of the comments problem to bug, but it is currently assigned to John Ellis, who probably doesn't have time to work on it.
- Jan Smith and Sean Keesler launched their new Sakai/OSP consulting venture, Three Canoes Consulting. Their website is at threecanoes.com.
