2007-06-25 Conference Call

Report on Friday meeting

    2 groups (short term and long blue sky term) groups
    need for starter structures in OSP distribution
        - the starter structure in terms of presentation could be a professional development portfolio
        - need to decide what this will be, who going to do it - deadline is before codefreeze, as it will come in handy for QA
        - will need documentation on how to instal the starter structures, as well as a help doc that documents process and links to community library,
            where the starter pack will reside

Promotiong OSP as a core tool

    - permissions and skinnable portal use (John Ellis will merge permissions work and will get to the portal task after internationalization of forms)

Aggregated View

    Beth started working on aggregated view - matrix
    Question - can reports handle this aggregated view?
        - probably not - also work has already started

Goal Management

    RSmart and Indiana has lead - nobody from RSmart or Indiana could make the call, they are meeting tomorrow so we will have news next week.
    A lot of architecture put in place to move taggable API

Improving UI

    Sean K contacted UI DG, still no response
    Sean D working on a unified use case

Reports

    RSmart and Indiana has lead - nobody from RSmart or Indiana could make the call, they are meeting tomorrow so we will have news next week.

Portfolios

    Tony Camilli will start on this week. Most of the JIRA issues seem to be assigned to Chris Maurer. Tony will update the Portfolios section by next week meeting.

OSP Community Library

    Very close - waiting on Nate.

Helpers

    XSDWeaver: Get process going to make it a contrib tool. Adding "description" and "xml:lang" functionality (John Ellis working on the metaobj side of this)

NEXT MEETING - July 2, 11AM EDT, 17:00 Amsterdam
