PC-Sakai 2.5 Plans

01-Jun-2007 Version 1.0 of SiteStats (currently alpha):

- Overview page:
  - Separate charts for visits and activity
  - Pie chart with activity per tool (percentage)
  - Data presented faster to user (blocks of data loaded one by one with ajax)
  - Chart width adjusted to available space
  - Charts can be saved to disk (images instead of tables)

- Reports page:
  - Redesigned UI for more fine grained searches:
    - select visits, events (select by tool or event) or resources (all or selected)
    - select predefined or custom date intervals
    - select all users, users by role, group, custom user selection, users not matching conditions

- Tools (can be) filtered with available tools in site
- (more)
