

(active) Sakai 10.3-RC01 Testing

Sakai 10 qa1 Testing corresponds to the first round of QA testing for Sakai 10

Sakai 10 Test Fest

Sakai 10.3 Testing Overview

More QA volunteers would be helpful. Please email saikaordinator@apereo.org (email alias for Neal).

Testing needs

Try and break Sakai 10.3-RC01. Try many different tools. For your convenience, here are some checklists to get you started. However, you may want to vary them by using different settings and values that might "break" Sakai.

[Announcements checklist](#)

[PDA checklist](#)

[Resources checklist](#)

[Samigo test and quizzes](#)

[Wiki checklist](#)

[Web Content Tool checklist](#)

Testing fixed issues

All issues that were merged into 10.x, had been tested in trunk before merging. Re-testing in the 10.x branch is another great way to prevent regressions and ensure the functionality is working as intended. See the list of 10.3 fixes. Use the label "10xtested" to indicate a JIRA you have tested in the 10.x branch.

Please open new Jiras and relate to the parent 10.3 Jira -

 [SAK-28093](#) - Sakai 10.3-RC01 new issues
CLOSED

Thanks!

QA meeting

QA check-in (or real time Test Fest) - TBD

Test Plan Overview

Sakai 10.3 Testing Details

Relate Jiras to the parent ticket -

 [SAK-28093](#) - Sakai 10.3-RC01 new issues **CLOSED**

Testing server - [Longsight QA server](#)

Source code changes for Sakai 10.3 - [Sakai 10.3 source code changes](#)

10.3 fixes - <https://jira.sakaiproject.org/issues/?filter=15016>

If you find a bug

If you find a bug in Sakai 10, please test to see if the issue exists on 10.x on server - [Sakai nightly 10.x](#) . This will help determine if it is a regression.

To Get Your QA questions answered

To get your questions about QA testing answered, please email the QA group at sakai-qa@collab.sakaiproject.org or directly to [Neal Caidin](#) - Sakai Community Coordinator

[Searching for Jiras using Google](#)

Before you start!

Create a Jira account: <https://jira.sakaiproject.org>

Subscribe to the QA email group: <http://collab.sakaiproject.org/mailman/listinfo/sakai-qa>

Jira Process

1. [Sakai Jira Guidelines](#)
2. Everyone with a Jira account can create tickets, sub-tickets, search the system and add comments. Anybody can make a Jira account for him/herself. Others have additional permissions to update the fields on the ticket to reflect current status. If you think you need this level of access contact neal.caidin@apereo.org.
3. Updating a ticket with the "Tested" button - to verify a ticket requires clicking on the "Tested" button. You must be logged in to Jira and part of the Jira QA group. If you wish to be added to this group contact neal.caidin@apereo.org.
