4. Demos of Duplicate Site and Roster Syncing
  - Duplicate site demo met with approval, but it was moved that all settings (e.g. sharing) should be set to false (should be in the state of a newly-created portfolio.)
  - Roster Syncing. Perhaps the roster syncing should be part of the new Site Info import roster functionality. Would be doable, since the roster syncing uses a helper tool. Would want a way to combine the steps of associating a site and syncing rosters.
