

# Sousa Page Examples

## Notes on Sousa Page Examples

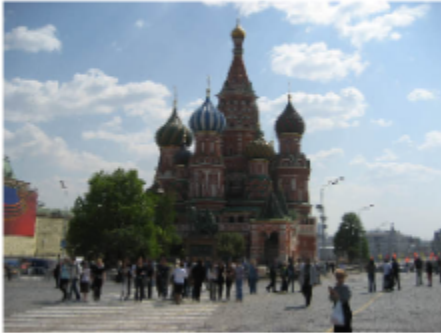

Not all of these are taken from the actual application. Some of them are speculative or drawn from early designs. However, they do illustrate the capabilities and potential for Sousa page layout.

St. Basil's Page

### St. Basil's Cathedral

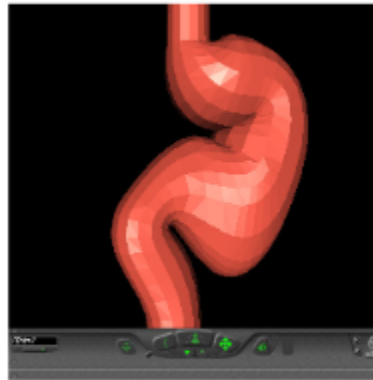

In May of 2000, I visited Moscow on business. While there, I had a chance to do some sight seeing. St. Basil's Cathedral is a wonderful example of Russian Orthodox architecture. It was spared destruction from Stalin's construction plans for Moscow only because one of his aids intervened and saw that Russia needed at least one example of old style churches. The inside isn't all that much to see, but the exterior is wonderful. The onion domes are kept painted and gilded. The statues have been restored. It's one of the popular tourist sites, as you can see from this photo.

St. Basil's in Moscow

### The Virtual Stomach

Below is a 3D model of the human stomach. Use mouse controls to move around and view the organ from different perspectives.

Rotate around the object.  
 Zoom in on the object.  
 Move horizontally and vertically.  
 (Hold the shift key down to go faster. Mouse controls work, too.)

### Land of the Dinosaur

Dinosaurs lived very long ago, before the start of the last ice age. The earth was a much warmer place at that time.

<http://www.mydinosaur.edu>

If you could be a dinosaur, which kind would you be and why? Use the link at the right to explore different species of dinosaur.
