

# 2007-07-30 Conference Call

## 2.5 Requirements update

### Promoting OSP as a Core Sakai Tool

Not much news, different areas have been assigned to different people.

- SAK-10452 - "Create out-of-the-box datastructures for initial use and test of OSP" Wendy is going to query folks as to what these datastructures should be - also integrate with community library issue.
- SAK-10858 - Beth will ask Noah what his intentions are for "Tool list is far too long with OSP tools enabled - Consolidation requested"
- SAK-10151 Reconcile the OSP portal with the new skinable Charon portal - on track --> will require changes in the portal component, probably on a branch that will merge later into trunk
- SAK-10672 osp perms need default settings - on track - > looking for more elegant solution than database action

### Aggregated View & Dashboard

- Work/discussion started on SAK-10140 - "Portfolio tool with share of aggregated sites, roles, users"
- No news on SAK-10149 OSP Dashboard Summary of Events (Activity Log) & Synoptic View" - if there are no developer resources we will have to drop from 2.5
- SAK-10236 Email notification for portfolio work, matrix & wizard page submissions - also will be taken off requirements if there is no dev resources.
- SAK-8207 Add event logging around user operations - Tony Camilli will see if can check in changes

### Goal Management Tool

- GM-128, GM-129 are the only ones that Jim Pease can work on (Taggable API)
- Also - if there are no developer resources associated with an issue that issue will be taken off the 2.5 requirements list.
- but will wait on rSmart for the word
- SAK-7464 Embedded images in resources not passing through security advisor - assigned to Josh Ryan - John Ellis will query
- A lot of issues assigned to Chris M by default - he might have some time for these, will keep these in list in any case

### Portfolios

might remove everything except for

- SAK-10093 "Downloading Portfolios causes an Error" since it is a bug
- SAK-10396 "Apply layouts to the entire portfolio rather than to pages, similar to the styles" since Bryan Halliday has started work on this.

### Reports

- will wait on rSmart for the word

### Meta-Tagging and Searching

#### OSP Community Library

- almost there

#### XSD/XSL/CSS/XHTML Builders

xsdWeaver in trunk, for 2.5 and working well

#### Institutional Priorities

Folks are encouraged to share *their* institutional priorities in this section.

### Other matters

Wendy encourages folks to let her know when they can come to the 2.6 planning meeting

SAK-10140 Portfolio tool with share of aggregated sites, roles, users - people should provide feedback now
