

2007-07-09 Conference Call

UI Review

- Shawn instituting a UI Review (see "Matrix UI Review" link on requirements page page)
- Gonzalo & Darren (Portfolio) can also help
- Darren would like framework for portfolio review (Shawn in initiate)

Production OSP Servers

- Rhode Island (production) – rSmart
- IU running on clustered production servers (16), but small implementation

Aggregated View (various definitions):

- User can use portfolio in my workspace
- publish portfolio within other groups other than tool it lives in
- Original OSP functionality – ability to share portfolios with any user (not constrained by worksites) also groups of users
- individual context and worksite users (and worksite groups or roles)
- purpose to reduce boundaries (including restrictions on site-types)
- we're talking about aggregating the worksites (not tools)

Dashboard View

- closer to tool aggregation
- Darren interested in design work
- Darren to add interesting tool info (u missouri) with event dashboard

Institution's status review...

Michigan:

- Beth working on aggregated views in matrix and portfolio tools

Indiana U

- Chris M to meet tomorrow regarding focus (possibly GMT)
- one new developer has limited java experience, other has ui/design skills

Unknown: Folks dedicated to GMT ??

LaGuardia

- Tony working on logging osp events

UCF starting work on template builder (Jason with UVA)
– XSD Weaver updates

Next Meeting:

Clarify priorities (and who IU and rSmart)
