

# Use Case - Whiteboard

Persephone would like to be able to have access to a persistent whiteboard feature in her course. This tool would let users draw, type, move objects around, etc. In addition, she would also like to be able to annotate over a web page with some kind of layering behavior.

Unknown macro: 'html'

This clip is intentionally audio-only.

The Agora project could be a lead to answer this request: <http://confluence.sakaiproject.org/confluence/display/AGORA/Home>
