Ok all of Chucks changes are now in 2-5-x bar 41787 & 41788. All the others after 41185 merged cleanly. 41787 is a change to the docs in reference - so I presume this is not a biggie.

41788 - are updates to the search adapters and this looks more serious - the search adapters seem to have been considerably refactored post 2-5-x. Ian or Chuck could you advise here?
