

2009-11-30 Conference Call

Meeting minutes for November 30, 2009

1. Sakai/OSP 2.6 Issues and Status (*Bug fixes can be verified on the following QA servers [Nightly Build \(HSQLDB\)](#) or [Nightly build \(Oracle\)](#)*)
 - [SAK-12914](#) Database error when importing osp matrix. Status should be downgraded from critical to major.
 - [SAK-16871](#) osp share sends wrong password, Only affects sites using default Sakai authorization. Should be fixed. We won't track it any more.
 - [SAK-17055](#) Matrix group filtering does not differentiate Sections from Groups. Only affects users in a site that also uses sections. Shouldn't be hard to fix and affects VA Tech, so we will continue to track it.
 - [SAK-17247](#) In IE8, Forms with required select fields (minoccurs=1) do not display the red asterisk
 - [SAK-17423](#) 503 for DTD request in templated portfolios that import other templates There is also a caching issue. We won't track it anymore.
2. Teaching and Learning
 - Josh Baron and David Goodrum were on the call. Pleased that Jan entered material in spreadsheet. Robin: does everything have to be in there or not? No. We are working in a mode of uncertainty. The spreadsheet is useful and will give something to sink our teeth into for charting a course forward for development. Clay Fenlasson will be on the T&L call this Wed. at 12 noon. We would like to plug into the process that Assignments used to get some design work done. This might be a good opportunity to have Sam Peck look at the OSP requirements and come up with something. Maybe this week would be a good time to stop and look over the functionality listed in the spreadsheet and group things and look for gaps. Noah: what will the output of this process be? On Wednesday this should be discussed. Between now and New Year this should jell into a clearer idea of next steps. There are now 100 items in the spreadsheet.
3. Sakai 2.7 Development Status
 - Status update: [2.7 QA Testing](#) Beth updated the link on the page.
 - SAK-17475 Chris is working on cleaning up dependencies with Assignments, which is affecting QA.
 - Known issues remaining for merged [SAK-15710](#) (IU enhancements). No progress since last week.
 - [SAK-15877](#) Ensure conversion scripts are correct
 - [SAK-16237](#) Not allowed to evaluate in Evaluations tool in My Workspace
 - [SAK-17350](#) Broken link back to associated assignment when editing a cell
 - [SAK-16557](#) Indexes are missing on OSP tables with Oracle
 - [SAK-16785](#) ~~Sortable columns in OSP Portfolio tool Beth applied it for Sakai 2.7. Go to nightly server, verify that it looks good. If so, add short note and close the ticket.~~
 - [SAK-17449](#) Portfolio Permissions can no longer be set. Related to IU work? Critical. Needs to be fixed in 2.7.
4. Standing Agenda Updates
 - Documentation & Communication
 - Moving content from <http://osportfolio.rsmart.com> to www.sakaiproject.org. No progress since last week.
 - Noah went through and looked for all the places we use properties and created a list of everything we use for OSP properties.
5. Three Canoes will be doing a training at the Marist mini-conference on 12/10 and 12/11.
