

# 2011-02-07 Conference Call

## Meeting Minutes for Feb. 7, 2011

### 1. Community Updates

- 2.8 QA Status [Test Scripts](#), [2.8 QA Signup](#) with links to test scripts
  - SAK-19878 Problem introduced in 2.6. Reassign from Zhen Qian to OSP Jira team, and reduce to Critical or Major from Blocker.
  - SAK-19881 Share Portfolio does not work as expected. You get two emails because it's really two processes -- create and account + view the Portfolio. Needs verification. Does the link from the email to the portfolio work correctly? Erica will verify it.
  - SAK-19837 There is no default constructor in the Java. You get a warning, but the export works. Downgrade to Major, since there is no collateral damage. Target it for 2.8.1. Fix would be complicated.
  - SAK-19714 Cancel button does not work in Wizards after editing Guidance. Guidance objects are separate entities, so interaction with them is separate. When you go back to the wizard, all you have is an id. The guidance itself has already been save. Kind of critical, but not necessarily for 2.8. The only way around it would be long term session stuff that would allow you to roll back the change to the Guidance when the Wizard is canceled. Reset to Major. Re-target it for 2.8.1, at which time we may decide not to do anything about it.
  - SAK-19184 Still outstanding
  - SAK-18344 Not targeted for 2.8 at all. Should be 2.9.
  - Things fixed:
    - SAK-19518
    - SAK-19795
  - SAK-19184 Is our only blocker-like item. Noah will try to fix it in time for the Release Candidate.
  - High Priority Issues

T Key Summary Assignee Reporter P Status Resolution Created Updated Due

No issues found
