

# Accessibility WG Teleconference Minutes Wednesday August 19, 2015

## Attending:

Matt Clare, Brock University  
Neal Caidin, Apereo/Sakai  
Rob Egan, NYU  
Karen McPhaul, Durham Tech.

## Agenda:

### rA11y Plan Update

<https://confluence.sakaiproject.org/display/2ACC/rA11y+Plan>

### Accessibility checker for CKEditor

Check out the demo <http://ckeditor.com/tmp/a11ychecker/plugins/a11ychecker/samples/a11ychecker.html>

I have a GPL'd copy at <https://drive.google.com/file/d/0B2ewqZFNbUdqRk0zbXZYWG9nbm8/view?usp=sharing> but we can't ship something GPL'd, and it looks very clear that we will not get a version of this under a more compatible licence.

There may be updated in time for our call.

### Morpheus

Ready for review!

-If you've got 5 min run the WAVE toolbar (<http://wave.webaim.org/> note the browser extension at the bottom) over page or and report issues it would help! This would certainly not be a comprehensive review, but it would help developers spot simple regressions and other low hanging fruit.

-Missing the visual access keys from neo-portal <https://jira.sakaiproject.org/browse/SAK-29771>

-Missing title tag <https://jira.sakaiproject.org/browse/SAK-29822>

-Focus on quizzes, <https://jira.sakaiproject.org/browse/SAM-2042>: Could we create a grease monkey script option for Sakai 11 , to address field focus? Matt to ask dev list. Use label of "morpheus" in Jira. Matt C. sent an appeal to Sakai-dev mailing list, no responses.

## JIRAs

<https://jira.sakaiproject.org/browse/SAM-2217> Form field labeling is inconsistent. Matt C gave some advice. Anyone want to comment or take up the work? -- Matt to split into more JIRAs in some way, alert sakai-dev about some possible "easy wins"...

<https://jira.sakaiproject.org/browse/SAM-2342> Extended matching type seems inaccessible

<https://jira.sakaiproject.org/browse/SAM-2218> Error messages do not take focus and might be difficult to find for some users
