

# Supporters

A special thank you to those projects and organizations who continue to support Sakai and the development of our project. Without the support of these organizations Sakai development would not be possible.

Atlassian provides the Sakai community with free community licenses for Jira, Confluence, Crucible and Fisheye. These products are used by the entire Sakai community and are critical to our development process.

YourKit provides the Sakai community with Java profiling tools used by Senior Sakai developers.

JetBrains provides free licensing to tools used by our development team.

Browserstack provides instant access to live, web-based browser testing for all mobile and desktop browsers.
