Sakai Roadmap

- [Sakai CLE](#)
 - [Sakai 10](#) (Current Release)
 - [Sakai CLE 2.9](#) is being maintained (Prior Release)
 - Previous 2.x releases are unsupported
 - [Sakai CLE 2.8](#) is a legacy release and unsupported
 - [Sakai CLE 2.7](#) is a legacy release unsupported

Sakai 10

The most current release is Sakai 10, which was released on June, 2014.

Support for older releases

Sakai generally maintains both the current major release and the prior one - which is now Sakai 2.9. However generally only critical bugs and security fixes are maintained in a previous release and in the maintenance release branch. It's generally recommended to upgrade to the newest version of Sakai shortly after it's released

Sakai 2.9

Sakai 2.9 was released in 2013 and is currently in maintenance mode.

The major set of new tools and capabilities in 2.9 include:

1. [Neo Portal](#)
2. [Lesson Builder](#)
3. [Mailsender](#)
