

Sakai 20 QA Hub

Overview

The **Sakai 20 QA Hub** is the home page for the Sakai 20 Quality Assurance effort.

For questions please contact sakai-qa@apereo.org

Communication Channels

Sakai QA list

Join the Sakai QA list (sakai-qa@apereo.org) to keep up to date on all things QA in Sakai. Anyone can join the group here: <https://groups.google.com/a/apereo.org/forum/#!forum/sakai-qa>

Sakai QA Slack Channel

We have a very active Sakai QA channel in Apereo's Slack instance. We use this for communicating during Test Fests and asking QA questions to the group or to individuals anytime. If someone at your institution has already joined, then you can self join at: <https://apereo.slack.com/signup>

Otherwise, send an email to sakai-qa-planners@apereo.org to have your institution's domain added for self signup. For a quick overview of Slack (along with some helpful tips n' tricks), see the following video: <https://youtu.be/aB8PsAn97uo>

Meetings

Weekly QA Planning Calls

The QA Planning Group meets every **Monday from 5:30 pm - 6:30 pm, Eastern time**. This group guides the overall direction of the Sakai QA effort, creates testing materials and processes, and participates in testing. Meetings agendas and notes can be found by following this etherpad link: <https://etherpad.nightly.sakaiproject.org/p/QA-Planning-Call>. All are welcome! We meet in the QA Room in BigBlueButton:

<http://apereo.blindsidenetworks.net/apereo/>
QA Room
password: apereo

QA Testing this week - 07/19/2020 - 07/25/2020

This week for QA, we will continue working on updating the regression scripts.

Here is a link to the spreadsheet:

<https://bit.ly/RegressionScriptUpdateMasterSpreadsheet>

For this project we will use the old regression script as a basis for the new regression scripts. We will omit old content that is no longer relevant. From there we will think about new test cases to test that people see among the schools that they work at. Overall goal is to make the regression scripts cover more testing space. Starting with the basic functionality to the everyday tasks for users. We will also be looking at JIRAs to see if there are some test cases we need to write into the regression script to test for.

The server we want to use for testing is the Sakai 21 branch.

This branch can be found here: <https://trunk-mysql.nightly.sakaiproject.org/portal/>

Regression Script Update Project Progress:

- High Priority Tools:
 - 10 out of 30 high priority tools are marked Complete.
 - 9 out of 30 high priority tools are marked Work in progress.
 - 8 out of 30 high priority tools are marked Ready to begin.
 - 3 out of 30 high priority tools need a script to be written.
- Medium Priority Tools:
 - 0 out of 18 medium priority tools are marked Complete.
 - 0 out of 18 medium priority tools are marked Work in progress.
 - 14 out of 18 medium priority tools are marked Ready to begin.
 - 4 out of 18 medium priority tools need a script to be written.
- Low Priority Tools:
 - 1 out of 33 low priority tools are marked Complete.
 - 1 out of 33 low priority tools are marked Work in progress.
 - 27 out of 33 low priority tools are marked Ready to begin.
 - 4 out of 33 low priority tools need a script to be written.

The Friday conference call (aka TestFest) will be held in the Sakai QA Room in BigBlueButton. BigBlueButton can be found by following this link: <https://apereo.blindsidenetworks.net/apereo/>. In the drop down menu for rooms select Sakai QA Room. The password is **apereo**. Starting time is 10:00 AM EST.

Look forward to seeing everyone at Test Fest this week.

Server to use for testing

Unless otherwise stated, all testing is taking place on the Sakai 20 server (refreshed weekly on Mondays).

When testing notifications/email, you can check the Mail Catcher server to confirm sent messages - <https://mail.nightly.sakaiproject.org/>

Reporting Issues via Jira

- [JIRA Authoring 101](#) - An introduction to finding and reporting issues.
- [Watch a short video of how the reporting works.](#)
- [JIRA Guidelines](#) - basic workflow, and definitions for Issue Type and Status

Weekly Test Fests

Join our QA "Test Fests" every **Thursday from 10am to 11 am, Eastern time!** This is an opportunity to jump into testing Sakai with the support of the QA Team and other community members. You do not need to be an functional expert to get involved. Test Fest agendas and notes can be found by following this etherpad link here: <https://etherpad.nightly.sakaiproject.org/p/QA-Test-Fest>. We begin our Test Fests in the QA Room in BigBlueButton (see left). Throughout the course of the Test Fest, we communicate using our new SakaiQA channel in Apero's Slack instance described under Communication Channels on this page.

*QA testing is informed by updates on the Core Team call and QA planning meetings which are held on Tuesday every week. Therefore, QA testing cycles usually run from Wednesday to Wednesday the following week. Longer QA cycles may be held during QA for major releases to accommodate more in-depth testing such as regression testing.
