We'll turn of these reports to the Sakai QA group tomorrow. We'll revisit at our next meeting via screen sharing like Big Blue Button.

Screenreader and keyboard nav experience compared between Sakai 10 and Sakai 11

Here's a 1 minute comparison of the keyboard navigation and as read by OSX Voiceover:

<http://www.screencast.com/t/I8f9lhKTOY>

Sakai 11 currently has a lot of poorly hidden items in the "Sites" menu <https://jira.sakaiproject.org/browse/SAK-30469>

We've lost the main access key reminders
