i>clicker *integrate* for Sakai

The i>clicker *integrate* for Sakai plug-in allows instructors to easily synchronize their i>clicker and i>grader data with their campus Sakai server. Learn more about i>clicker products and features from www.iclicker.com.

Features

- **Students:**
 - Register their remotes from within Sakai
- **Instructors:**
 - View reports within Sakai showing the status of student registrations in their classes
 - Download their Sakai class roster and registrations directly into i>grader
 - Upload i>clicker scores from i>grader directly into Sakai
- **Administrators:**
 - View and manage remote registrations

Sakai Compatibility

This plugin will work with Sakai version 2.x (2.9 or better). Sakai 10 requires the newest releases (1.5+).

Source

- The source code for the current release:
<https://github.com/azeckoski/iclicker-sakai-integrate/tree/1.6>
- The source for previous releases:
<https://github.com/azeckoski/iclicker-sakai-integrate/releases>
<https://source.sakaiproject.org/contrib/iclicker/tags/>
- The source for trunk (in development):
<https://github.com/azeckoski/iclicker-sakai-integrate>

Binary

- The binary version can be installed and configured without needing to be compiled first. Just download, extract, and follow the README.
