

Accessibility WG Teleconference Minutes 09-03-2013

Attendees

1. Joe Humbert
2. Matt Clare

Agenda

Working Through More of Brock University's Audit Report on Sakai 2.9.1

Building a public summary at <https://docs.google.com/document/d/1HTqshI3VqXgXhWNwyaR07xH-n8fJ6uRk8oocRMCKLBs/pub>

Turning identified issues into actions for developers/JIRA <https://docs.google.com/spreadsheet/ccc?key=0AmewqZFNbUdqdFBYSVJCd3I0RIYzOEtwVHZxZFIgeUE&usp=sharing>

A11y Jiras that need testing/review

- <https://jira.sakaiproject.org/browse/SAK-23740> Labels for time selection are displayed inconsistently

Accessibility Improvements to Forums

- Greasemonkey script created by Brian Richwine
 - Forum posts are in a list now using role="listitem" improving speed of keyboard access
 - Text info added to each post providing context. Example, "Message 2 is a reply to: Joseph A Humbert message:1"
 - Improved link text, "reply to message 2"
 - Choice of rich text editor or plain text area (would be separate jira)
- Next steps
 - Refine it at Indiana
 - Adapt to nightly and refine
 - Use as outcome to define changes to Forums itself

IDEA:

- Editor / No Editor preference?
- Worth investigating if *wysiwyg.editor=ckeditor can be elevated to a user preference and have "None" as an option?*

Giant list of A11y Jira issues:
