Sakai 11:

Finish going over the accessibility review from Rutgers (thanks again!):

- New Sakai Issues - Broken - UnAccessible - Google Doc Version: https://docs.google.com/document/d/1BAhBc3_5yj35Q2tEnnCLj1Dn8aJZvWi-uZakOIxhJk/edit?usp=sharing (left note where we wrapped up)
 - Last issue we looked at was header differences. Matt C. has since found lots of advice on not faking headings and being sequential - but none on size. Anyone else have any leads?
