

Screen shots

Adding a top-level page.

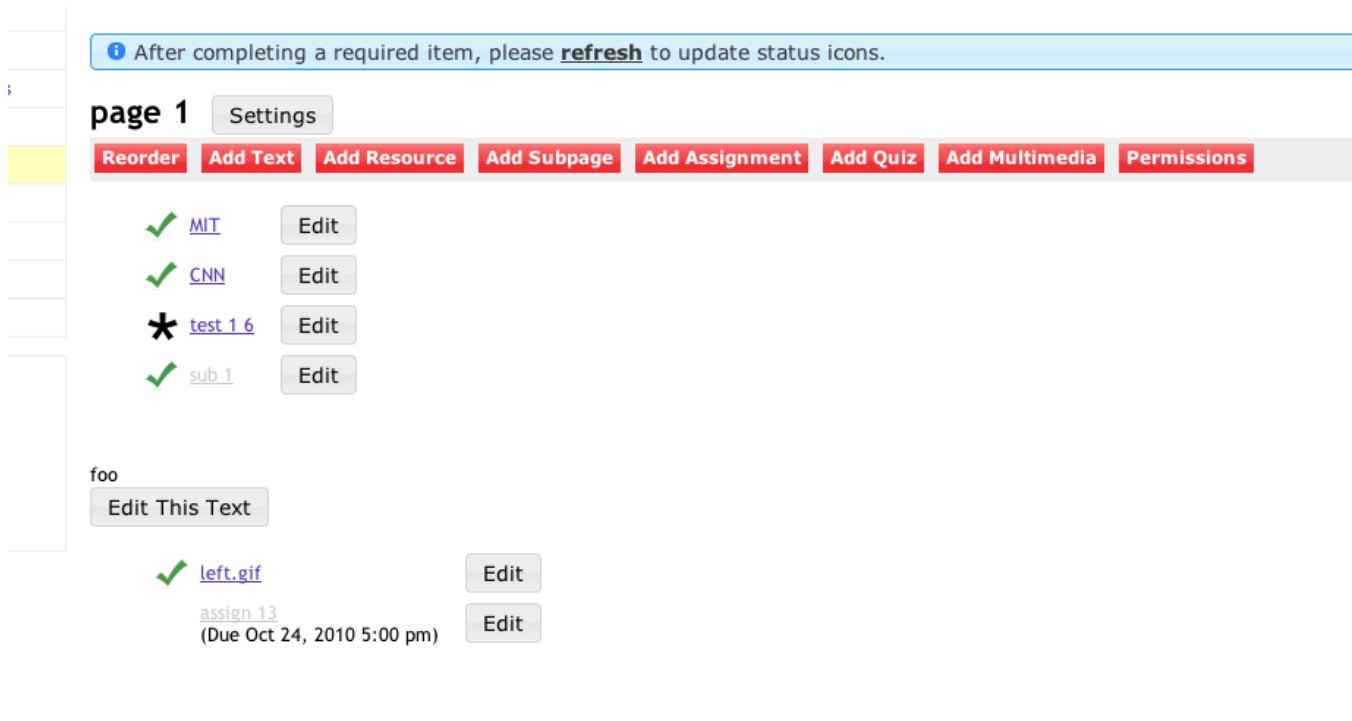

Top-level pages appear as separate Sakai tool instances so they are in the left margin.

The screenshot shows the 'Site Info' page with a yellow header bar. Below the header, there is a section titled 'Add Multiple Tool Instances' with a sub-section for 'Lesson Builder'. The 'Lesson Builder' section has a 'Title' field containing 'Unit 2' and a '(Suggested length 15 char.)' note. To the right of the title field is a 'Link to Library eReserves' button. Below the title field is a '+ More Lesson Builder Tools?' dropdown menu. At the bottom of the 'Lesson Builder' section are three buttons: 'Continue', 'Back', and 'Cancel'.

Editing a page

When first going to a new page, you are put into this page (with no content, obviously).

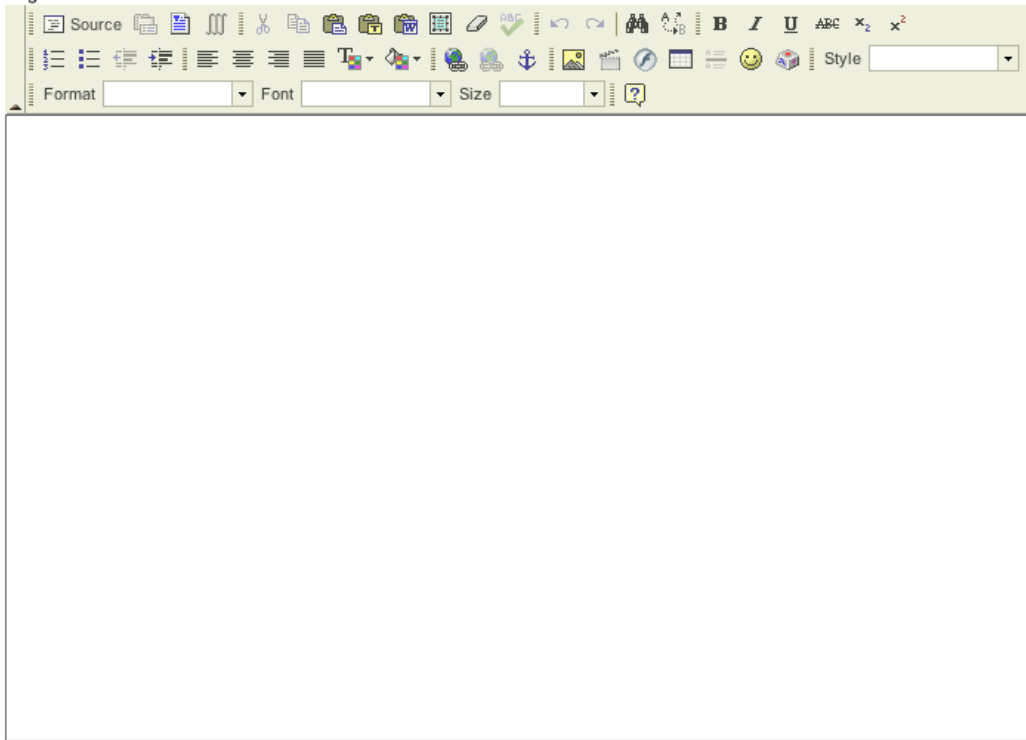

The screenshot shows the page editing interface. At the top, there is a blue information bar that says 'After completing a required item, please refresh to update status icons.' Below this is the page title 'page 1' and a 'Settings' button. A horizontal toolbar contains several red buttons: 'Reorder', 'Add Text', 'Add Resource', 'Add Subpage', 'Add Assignment', 'Add Quiz', 'Add Multimedia', and 'Permissions'. Below the toolbar, there is a list of items with status icons and 'Edit' buttons: a green checkmark next to 'MIT', a green checkmark next to 'CNN', a black asterisk next to 'test 1.6', and a green checkmark next to 'sub 1'. Below this list is a text area containing the word 'foo' and an 'Edit This Text' button. At the bottom, there is a green checkmark next to 'left.gif' with an 'Edit' button, and a greyed-out 'assign 13' with a due date '(Due Oct 24, 2010 5:00 pm)' and an 'Edit' button.

Adding HTML content

The normal FCK. There is a page property to control whether to filter HTML (not yet shown in the UI).

Page Content

A rich text editor interface with a toolbar at the top. The toolbar includes icons for source code, undo, redo, bold, italic, underline, text color, background color, link, unlink, list, indent, outdent, and style. Below the toolbar are dropdown menus for Format, Font, and Size. The main content area is a large, empty rectangular box.

Adding a subpage

When you first go to it, you have a blank page editor.
